# PETER JONES

---

To whom it may concern,

I am in Web Developer positions to start following my May graduation this year. I am currently a Senior Computer Science Major with a concentration in Software Development at Messiah College in Pennsylvania. I am looking to employ my skills by meeting the needs of a company like this and would strongly consider an available position in that area.

As indicated in my resume, I have had two internships with international companies developing web applications using both AngularJS and EmberJS. I also have experience working with JQuery, HTML5, CSS3, Bootstrap, NodeJS, Selenium, PHP, and MySQL. Throughout these experiences I have used SCRUM while working with team members to determine work load and deliver quality code on time.

Beyond my internships with Gateway Ticketing Systems and CURE International, and course work at Messiah College, I have done some freelance development in my free time. Some examples of this work is listed in my resume.

Attached is my resume for further detail on my experience and qualifications. I would consider it an honor to work with you and would be willing to learn new skills from an opportunity such as this. I am also strongly considering relocation to Florida in the very near future. Thank you for the considerations. I look forward to hearing from you regarding any potential opportunities. In the meantime, please feel free to check out my site at [PeterJones@netai.net](mailto:PeterJones@netai.net), or contact me at [pj11607@gmail.com](mailto:pj11607@gmail.com) or 717-343-5368.

Sincerely,

Peter Jones
